

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method of reconstructing visual stimuli observable through a browser-based interface, comprising:

receiving a selection of content for reconstruction;

retrieving data related to the content;

calculating [what] an amount of content to display based on the data; and

reconstructing [a] the display, wherein the reconstructed display represents visual stimuli as it was previously displayed.
2. (Original) The method of claim 1 wherein the data is a network address of online content displayed within a browser window at a point in time.
3. (Original) The method of claim 1 wherein the data is a two-dimensional offset of the online content displayed within a browser window.
4. (Original) The method of claim 1 wherein the data is a two-dimensional position of a pointing device.
5. (Original) The method of claim 1 wherein the data comprises textual and binary objects systematically displayed within each browser window.

6. (Original) The method of claim 1 wherein the data is a graphical image of online content as displayed in a browser window.

7. (Currently Amended) The method of claim 1 wherein the data is an inventory of objects that comprise online content, and [the] a two-dimensional position of each object in a browser window.

8. (Original) The method of claim 1 wherein the data is a user eye position.

9. (Original) The method of claim 1 wherein the data is a pupil dilation.

10. (Original) The method of claim 1 further comprising retrieving data.

11. (Currently Amended) The method of claim 1 further comprising calculating [the] a size of a visual area.

12. (Original) The method of claim 1 further comprising masking an area of a visual area.

13. (Original) The method of claim 1 further comprising displaying the visual area.

14. (Original) The method of claim 1 wherein data is stored as an article identifiable as an alphanumeric string.

15. (Original) The method of claim 1 further comprising assigning a unique ID to each parent web page and each child web page.

16. (Currently Amended) The method of claim 1 wherein the calculating calculates the original size and position of each browser window as it was ~~originally~~ previously displayed.

17. (Original) The method of claim 1 further comprising calculating at least a visual area.

18. (Currently Amended) The method of claim 12 wherein the masking is achieved via colorizing.

19. (Currently Amended) A system for data storage device that maintains a method of reconstructing visual stimuli observable through a browser-based interface, comprising [by]:

- means for receiving a selection of content for reconstruction;
- means for retrieving data related to the content;
- means for calculating [what] an amount of content to display based on the data; and
- means for reconstructing [a] the display, wherein the reconstructed display represents visual stimuli as it was previously displayed.

20. (Canceled)

21. (New) A computer readable medium comprising instructions for:

- receiving an article of online content to be reconstructed;
- receiving a duration of time to reconstruct that the online content was visible;
- receiving at least one composition used to represent visual stimuli as it was previously displayed; and
- reconstructing the previous displayed visual stimuli based on the article of online content and the duration of time, using the at least one composition.
